

Becknell Industrial has broad experience in the design, development, construction and ownership of properties with extensive freezer and cooler capabilities. During the past ten years, we have been chosen to build 11 of these types of properties that were specifically designed to meet the needs of some of the largest and most recognized names in the industry.

Becknell achieved LEED certifications on two of the above projects. Our 34,000 square-foot property in Schaumburg, Illinois, was awarded LEED Certified status and our 34,000 square-foot property in Tinley Park, Illinois, was granted LEED Silver certification. Both of these projects contain more than 70 percent freezer space. In addition, Becknell constructed an 228,000 square-foot fully refrigerated facility for Hanson Logistics in Hobart, Indiana.

Most recently, we were selected to build a 104,000 square-foot meat processing facility in Sheboygan, Wisconsin, that includes a nearly \$4 million freezer-cooler component.

Becknell understands and has the unique and specialized knowledge that is needed to successfully and efficiently construct freezer and cooler facilities. We are experienced in working with customers to design, engineer and construct buildings and facilities to their required specifications.

Whether your needs require a box in box or a full design, the Becknell team can assist you from the concept phase all the way through to the design-build process.

TENANT	CITY	STATE	YEAR BUILT	BUILDING SIZE
CSL Plasma	Whitestown	IN	2016	68,000
Buddig	Sheboygan	WI	2015	104,000
